

FullStack - Team Lead

Location: Málaga, Spain (in-office)

Type: Full-time, Permanent

Experience: 8 + years

Key Responsibilities

- Design, develop, and maintain robust and scalable frontend & backend solutions. The backend will use Java and Spring Boot while the frontend will be mostly web components developed using ReactJs.
- You will lead the team on a daily basis, making sure we are on track with the features planned for the quarter. Every Quarter scope will be defined in advance with the team in Stockholm.
- You will collaborate with frontend and backend experts and you will be responsible for making decisions around the product and in consideration of the company guidelines.
- You will deploy, manage, and monitor services in the cloud using AWS and Kubernetes.
- Maintenance CI/CD pipelines to ensure smooth and reliable deployments.
- Integrate and manage asynchronous communication via queueing systems.
- Collaborate closely with the Product Owner and developers; participate in code reviews and architecture discussions.

Must-Have Skills

- 8+ years of professional fullstack development experience.
- Strong experience with Spring Boot and microservices architecture.
- Production experience with Kubernetes: deployment, scaling, service discovery.
- Eyes for detail when it comes to frontend UI /UX.
- Professional experience with AWS or equivalent, including services such as ECS/EKS, RDS, S3.
- Experience working with message queues — specifically AWS SQS (or SNS, Kafka).
- Good understanding of relational databases (PostgreSQL or MySQL).
- Hands-on experience with Docker.

Nice to Have

- Experience with observability tools (e.g. Prometheus, Grafana, ELK).
- Familiarity with security practices (OAuth2, IAM roles, JWT).
- Experience working in startup or early-stage product environments.
- Experience with working closely with a designer and delivering web products.

Additional Info

- Office-first policy: Role requires working onsite in Málaga. Remote work flexibility may be considered later.
- English fluency is required. Spanish is a plus but not mandatory.
- You'll be working closely with the Product Owner, who will be hands-on in coding and code reviews.
